Cohort average (n=24)			52	86	73	90	75.0	9.0	1749	0.09

Analysis — what the numbers say

1. **Performance is the whole story.** SEO (90 avg) and accessibility (86 avg) are broadly healthy across the cohort; performance (52 avg) is where everyone bleeds — 14 of 24 sites score under 60. The platforms differentiate on *speed*, not on SEO or markup.
2. **The two Shazamme sites win performance outright.** Sutherland **93** and Tollgroup **91** are the only sites in the 90s, with sub-100ms blocking time and near-zero layout shift. Every competing platform's flagship is 30–70 points slower on the metric users actually feel. Only soft spot: accessibility (Sutherland 69) and Tollgroup best-practices (54) — cheap wins to lock in a clean sweep.
3. **Volcanic is the worst-performing platform** (perf avg 27): Sharp & Carter **17** (LCP 16s, CLS 0.52) and Ambition **37** (LCP 19s). Both are effectively broken on mobile load — a strong competitive contrast.
4. **Worst individual offenders:** Main-thread jank (TBT) — BHP 10.1s, Dunhill 7.4s, Smiggle 6.1s. Slow hero (LCP) — Camino 27s, Ambition 19s, Sharp&Carter 16s. Layout shift (CLS) — SCR Hired 0.77, Sharp&Carter 0.52, Pearl 0.40; all three fail Core Web Vitals on CLS alone.
5. **Job-board / apply link-outs correlate with the worst scores.** Pearl (flagged "link-out JA jobboard / bad architecture") lands #17 with CLS 0.40; the linkout-style corporate sites (BHP, Smiggle, Sharp&Carter) cluster at the bottom. The embedded-ATS approach (Shazamme Sutherland/Tollgroup, Applyflow TRS) consistently outperforms.
6. **SEO laggards** worth a closer look if they're prospects: Smiggle 67, AVID 69, BHP 75 — the only sites materially below the 90 cohort SEO average.

Method note: each site was graded once (single Lighthouse run, mobile, cold cache). Lab performance scores vary ± 5 –10 points run-to-run, so treat the four category numbers as directional; the LCP / TBT / CLS field diagnostics are the reliable signal. Re-running bottom-tier sites 3× and taking the median, or adding a desktop pass, is available on request.
